

Gamaliel 'Yel' Padillo

Experienced Full-stack Software Developer who can bring a diverse skill set and creative drive to software application development. Proficient at writing code in various languages, and feature development and implementation.

EXPERIENCE

MyEtherWallet, Inc. Los Angeles, CA - Full Stack Developer

February 2018 - Present

- Develop and manage an open source repo dedicated to interacting with the Ethereum blockchain
- Write a NodeJS script to test token address validity.
- Add phishing detection to existing chrome extension
- Fix issues submitted by the community
- Sign zip file with a GPG key on deploy in TravisCI to ensure users that they are downloading the current version
- Automate adding tokens to a smart contract by taking all the missing tokens from Github, create and signing the transaction and sending it to Ethereum
- Set up Webpack to generate static assets for users to download

Oomba, Inc. Irvine, CA - Software Engineer

April 2016 - November 2017

- Convert current company's web app from AngularJS to React.
- Developed an internal database user interface still in use to this day.
- Constructed a tournament creation wizard to guide users through event or tournament creation step by step.
- Created a tournament informational web app to allow store owners to register stores as a tournament venue.
- Managed an internal GraphQL server allowing our front end web app to communicate to our API in a more efficient manner.
- Utilize version control through GitHub to create stable releases.
- Refactor parts of our code base for readability and reusability purposes.
- Utilize browser dev tools and Xcode emulator to test cross-browser compatibility.

Rich Honey Apparel, Los Angeles, CA - Web Developer

September 2016 - June 2017

- Lead technology adoption, project timetables, code refactors, and bug fixes.
- Developed an informational application to showcase products and inform clients about company process and products.
- Created company specific templates in Shopify.
- Integrated 3rd party plugins for Shopify stores.
- Optimized website performance by utilizing server side rendering through prerender.io, and minifying javascript and CSS.
- Implemented web pages and other features from PSD's given by our designer.
- Managed SSL certificates, Web hosting, and Domain names.
